

Find the Mixed Equivalent Fractions

LO: I can write the equivalent fraction.

Fill in the numerator to make the fractions equivalent.

1.

$$\frac{1}{2} = \frac{\square}{4}$$

2.

$$\frac{1}{12} = \frac{\square}{24}$$

3.

$$\frac{1}{10} = \frac{\square}{20}$$

4.

$$\frac{1}{8} = \frac{\square}{16}$$

5.

$$\frac{3}{20} = \frac{\square}{40}$$

6.

$$\frac{1}{6} = \frac{\square}{12}$$

7.

$$\frac{1}{5} = \frac{\square}{10}$$

8.

$$\frac{1}{4} = \frac{\square}{16}$$

9.

$$\frac{3}{10} = \frac{\square}{20}$$

10.

$$\frac{1}{3} = \frac{\square}{12}$$

11.

$$\frac{7}{20} = \frac{\square}{40}$$

12.

$$\frac{3}{8} = \frac{\square}{16}$$

13.

$$\frac{2}{5} = \frac{\square}{20}$$

14.

$$\frac{5}{12} = \frac{\square}{24}$$

15.

$$\frac{19}{20} = \frac{\square}{40}$$

16.

$$\frac{3}{5} = \frac{\square}{20}$$

17.

$$\frac{5}{8} = \frac{\square}{16}$$

18.

$$\frac{2}{3} = \frac{\square}{6}$$

19.

$$\frac{3}{4} = \frac{\square}{8}$$

20.

$$\frac{4}{5} = \frac{\square}{10}$$

21.

$$\frac{5}{6} = \frac{\square}{12}$$

22.

$$\frac{7}{8} = \frac{\square}{16}$$

23.

$$\frac{9}{10} = \frac{\square}{40}$$

24.

$$\frac{11}{12} = \frac{\square}{24}$$

Find the Equivalent Fractions **Answers**

Fill in the numerator to make the fractions equivalent.

| Question | Answer |
|----------|--------|
| 1 | 2 |
| 2 | 2 |
| 3 | 2 |
| 4 | 2 |
| 5 | 6 |
| 6 | 2 |
| 7 | 2 |
| 8 | 4 |
| 9 | 6 |
| 10 | 4 |
| 11 | 14 |
| 12 | 6 |

| Question | Answer |
|----------|--------|
| 13 | 8 |
| 14 | 10 |
| 15 | 38 |
| 16 | 12 |
| 17 | 10 |
| 18 | 4 |
| 19 | 6 |
| 20 | 8 |
| 21 | 10 |
| 22 | 14 |
| 23 | 36 |
| 24 | 22 |
